PRODUCTION OF ZINC WHITE IMPROVED

The production of zinc white at the Metalchimica Factory in Ploesti was 47,920 kilograms for the last 7 months of 1948. The time for running a charge in a furnace has been reduced from 8-12 hours to 4 hours. The weight of the charge has been increased from 50 kilograms to 75 kilograms.

Innovations and improvements of the equipment by technicians and workers have saved large quantities of raw material and fuel. The factory will begin production of its quota for the second quarter of 1949 on 18 April.
